SUMMARY

Computer Science graduate with internship experience in operational data validation, KPI monitoring, and workflow automation. Skilled in SQL, Excel, Power BI, and Python, with projects in ecommerce reporting, customer segmentation, and funnel analysis.

TECHNICAL SKILLS

Data Analysis: SQL, PostgreSQL, Python, Pandas, NumPy, Excel, PivotTables
Business Intelligence: Power BI, DAX, Power Query, Data Modeling, Tableau
Analytics: Data Validation, KPI Reporting, Trend and Variance Analysis, Funnel Analysis, Root-Cause Analysis, RFM Segmentation

EXPERIENCE

Dyno Research Org Jan 2025 – Aug 2025
Associate Data Analyst Intern Indore, India

- Managed and validated 200+ structured records and centralized operational information to support reporting and reduce repetitive administrative work.
- Built a real-time monitoring workflow to improve access to operational information and support faster information retrieval.
- Analyzed operational KPIs and exceptions to identify abnormal patterns; documented processes and data flows to support onboarding.

47Billion Nov 2023 – Apr 2024
Technical Intern – Data & Performance Analysis Remote

- Evaluated performance across 5+ application pages and investigated 15+ application issues to identify bottlenecks and their underlying causes.
- Collaborated with development and design teams to translate functional requirements into implementation and validation activities.

SELECTED ANALYTICS PROJECTS

Ecommerce Revenue & Customer Analytics Live Demo | GitHub
Power BI, DAX, Python | Portfolio project

- Built a star-schema data model for 25,000+ transactions and applied RFM segmentation to organize customers into eight value segments.
- Developed a five-page dashboard with DAX measures for year-over-year growth, target variance, and customer lifetime value to explore revenue and customer performance.

Corporate Analytics Platform Live Demo | GitHub
PostgreSQL, Node.js, React, WebSockets | Portfolio project

- Built a real-time dashboard for continuous KPI monitoring using PostgreSQL and WebSockets to deliver updated operational data.
- Implemented rolling-window Z-score anomaly detection and funnel analysis to flag unusual metric changes and identify drop-off points.

ProductLens AI – Product Intelligence Platform Live Demo | GitHub
Python, FastAPI, PostgreSQL, React, LangGraph | Portfolio project

- Built and deployed a platform combining KPI anomaly detection, root-cause analysis, and customer-feedback analysis with RICE/ICE feature prioritization.

EDUCATION

Indore Institute of Science & Technology Jun 2026
B.Tech – Computer Science & Engineering

Indian Institute of Technology Patna Expected 2028
Executive MBA (EMBA) – Generative AI & Product Management
Hybrid Program

CERTIFICATIONS & PROGRAMS

IBM Data Analyst Professional Certificate | AWS Certified Cloud Practitioner
Accenture Developer Program – Python & Generative AI
